

BLUFF YOUR WAY '9', '11' and 'sus4' CHORDS

ONE MAGIC FORMULA

The more tunes you play, the more you will see chords with the numbers 9, 11 and sus4 after them.

It is important to learn how to play these chords because they all add 'colour' to your tunes.

I have devised ONE MAGIC FORMULA that let's you bluff all three types of chord easily...

BLUFF YOUR WAY - '9', '11' and 'sus4' CHORDS

part 1 - Where the numbers come from

Chords are based on SCALES

Chord NOTE NUMBERS are derived from these scales

For instance, this is a C7 scale - (2 Octaves)

The chord of C uses 1 3 5 = C E G

The chord of Csus4 uses 1 3 4 5 = C E F G

The chord of C+ uses 1 3 5# = C E G#

The chord of C6 uses 1 3 5 6 = C E G A

The chord of C7 uses 1 3 5 7 = C E G Bb

The chord of C9 uses 1 3 5 7 9 = C E G Bb D

The chord of C11 uses 1 3 5 7 9 11 = C E G Bb D F

BLUFF YOUR WAY - '9', '11' and 'sus4' CHORDS

part 2 ONE MAGIC FORMULA

Notice that the ADDED notes for C9 are **B^b - D**
the ADDED notes for C11 are **B^b - D - F**
and the ADDED notes for Csus4 is **F**

Now notice that **B^b - D - F** is the chord of **B^b major**

So if you play the chord of B^b major with your right hand and play a left hand bass (ROOT) note of C you will roughly hear the 'sound' of the C9, Csus4 and C11 chords

From this example we can easily work out a FORMULA to enable you to EASILY BLUFF any '9', '11' or sus4 chord...

Notice that the RIGHT hand B^b chord is 2 notes LEFT of C

So the MAGIC FORMULA is...

TO BLUFF X9 or X11 or Xsus4

LEFT HAND - plays the ROOT note of X in the bass

RIGHT HAND - plays a MAJOR chord whose ROOT note is 2 notes LEFT of X

REMEMBER TO COUNT BLACK KEYS

EXAMPLES OF BLUFFED 9, 11 and sus4 chords

D9, D11 or Dsus4

B^b9, B^b11 or B^bsus4

G9, G11 or Gsus4

F9, F11 or Fsus4

BLUFF 9, 11, sus4 PRACTICE PROGRESSIONS

Rhythm - Bossa Nova Bounce (HUNGRY HEART - Bruce Springstein)

G (bkwds)	Em (middle)	Am7	Dsus	Keep repeating

MANNILOW MOOD

I thought it worth including a little chordal composition based on Barry Mannilow's style because there are several devices he employs in most of his songs (or at least in his arrangements of songs)

- Very often they change key several times which creates tension and movement that wants to be 'resolved'. The keys move upwards which builds the song up in an emotional way.
- He uses a lot of slash chords. ie C/D which resolves to D. They will either be written as slash chords OR as 9, 11 or sus4 chords. But basically it's the formula on page 4.
- He often employs a 3 beat slash chord pattern where the vocal gets drawn out and is quite dramatic (you've heard Frank Sinatra doing it a million times) You will see this used at the start of songs and then just before certain verses or the chorus.
- Notice also the bass runs that lead onto the next chord.
- He also uses CLUSTER chords (we'll look at these later) again to create a bit of dissonance and tension

Try the next tune and see if you can spot all these devices. Then try writing your own Mannilow-style song.

MANNILOW MOOD

DIMINISHED CHORDS

Diminished chords add a very distinct sound to any tune. The good news is they aren't really THAT difficult to learn.

One way to make a diminished chord is to play a MINOR chord (in ROOT position) and move the 5th (your small finger) DOWN one key.

ie. to make **C^o** (C diminished)

(which could also be written as Cm⁻⁵ or Cm^{b5} or Cdim)

First play **Cm**

Then move the 5th DOWN one key to make **C^o**

See if you can form **D^o**, **E^o**, **F^o**, **A^o**,

Remember, make the minor first then drop the 5th down a key

DIMINISHED CHORDS

ALL YOU NEED TO LEARN ARE 3 SHAPES

Another very useful thing to remember about diminished chords is that they connect up in a most GEOMETRIC way

Notice how the groups of four diminished chords on the left ALL fit into the ONE shape to their right. Check it and see for yourself!

C^o = C Eb Gb
Eb^o = Eb Gb A
F#^o = F# A C
A^o = A C Eb

Db^o = Db E G
E^o = E G Bb
G^o = G Bb Db
Bb^o = Bb Db E

D^o = D F Ab
F^o = F Ab B
Ab^o = Ab B D
B^o = B D F

So if you MEMORISE these 3 SHAPES you can EASILY play ANY diminished chord

DIMINISHED CHORD PRACTICE PROGRESSIONS

Rhythm- Left note / Right chord (YOU MAKE ME FEEL SO YOUNG)

C	C# dim	Dm	G	Keep repeating
---	--------	----	---	----------------

Rhythm - Left note/Right chord (TUXEDO JUNCTION "Way down South..")

G	G/B	C	D	G	G/B	C	D
G	G/B	C	C ^o	D	D	G	

Rhythm - Half Beat Bounce (SHE - Charles Aznavour)

D	Fdim	G	D B	Em	B ^b dim

at www.sheetmusicdirect.com or www.musicnotes.com or www.musicroom.com

RIGHT HAND CLUSTER CHORDS

A CLUSTER chord is a chord in which two (or three) of the notes in the chord are CLUSTERED together.

Up to now you have played evenly spaced three note chords. If you ADD in an extra note INTO the chord you can make some very interesting sounds.

Try the following examples - ALL RIGHT HAND

C(added 6) Middle Inversion

CHORD TONES 5th 6th Root 3rd

Fingering 1 2 3 5

Fmaj7 Middle Inversion

CHORD TONES 5th 7th Root 3rd

Fingering 1 2 3 5

Am (added 9) Middle Inversion

CHORD TONES 5th Root 9th 3rd

Fingering 1 3 4 5

Can you hear the TENSION within the chord?

Now try the 2 bar song intro's on the next two pages

RIGHT HAND CLUSTER CHORDS

In the style of **FOOL ON THE HILL** - The Beatles

C6 Middle Inversion

F6 Middle Inversion

Rhythm - Oom Pah

C6

F6

C G F C

In the style of **ALONE AGAIN NATURALLY** - Gilbert O'Sullivan
and **EVERYBODY'S TALKIN' AT ME** - Harry Nilsson

Fmaj7 Middle Inv

F6 Middle Inversion

Rhythm - BOSSA NOVA BOUNCE

Fmaj7

F6

F

RIGHT HAND CLUSTER CHORDS

In the style of **WITHOUT YOU** - Harry Nilsson

Rhythm - SPLIT CHORD

In the style of **IT MUST BE LOVE** - Labi Siffri / Madness

Rhythm - NEW - Follow the notation & recording

EXTRA PRACTICE PROGRESSIONS

The following progressions are for improvisational purposes only to help you get used to the various rhythms and chords.

These progressions appear in other songs but limited space prevents me from mentioning them all.

Should you be inspired to play a particular song you can purchase sheet music online at

You Won't See Me	F	TWIST

BEATLES STYLINGS

You can have great fun practicing all your favourite Beatles songs and the rhythms in this book will help you play most of them. There are some stylings that we haven't covered that can make all the difference to your sound.

SEVENTHS

They used sevenths a LOT! Play any chord slowly and then move your thumb to the maj7 or the 7 and you will hear a Beatles song in your head.

BASS RUNS

They also made good use of bass runs. Try the following tune in the style of Penny Lane then go listen to the actual song and try to figure it out.

HA'PENNY LANE

G Middle

Marching Rhythm

G F# E D etc

Gm Middle

D

G F E D

You can do something similar with **FIXING A HOLE**

Rhythm - fast Half Beat Bounce

C	Cm/B	Cm/Bb	Cm/A	Cm/G	Cm/F#	F7
Cm7	F7					

BEATLES STYLINGS

BLUES & ROCK AND ROLL

The Beatles covered a lot of Blues and Rock and Roll songs and wrote many of their own. See how many Blues rhythms you can match up to Beatles songs.

Try the Blueberry Hill rhythm with **OH DARLING** and the 12/8 Jerry Lee Lewis style Boogie rhythm with **BACK IN THE USSR**.

Or modify the standard Blues rhythms to suit. Try this tune in the style of **LADY MADONNA** then work out the REAL song!

G Bkwards C G C G C

G G Bb B C C D C etc
